Career Objective

Bachelor of Information Technology graduate from Federation University Australia with a solid foundation in software development, web development, databases, cloud security and data analytics. Skilled in Python, JavaScript, SQL, HTML/CSS, AWS and Jira, with hands-on experience delivering a Flutter-based Android OCR application as Scrum Master of a client-facing capstone project using Agile practices, GitHub and user testing. I am seeking an IT role where I can apply my technical and analytical skills, contribute to a development team and grow my expertise in cybersecurity, data analytics and cloud technologies. I bring strong problem-solving, communication and teamwork skills, along with a reliable, detail-oriented approach developed through work alongside my studies.

Technical Skills

Programming Languages:	Python, JavaScript, SQL
Web Development:	HTML, CSS
Cloud Computing:	Amazon Web Services (AWS)
Mobile Development:	Flutter, Android SDK, Google ML Kit (text recognition / OCR)
Data Analytics:	Data analysis, data visualisation, data modelling
Project Management:	Jira, Agile and Scrum methodologies
Development Tools:	Visual Studio, Jupyter Notebook, GitHub
Design & Prototyping:	GIMP, Adobe Photoshop, Pencil
Game Development:	Unity, Blender

Education

Professional Year in Information Technology **2026 – Present**
Performance Education, Melbourne
Key Subjects: Australian Business Culture and Environment, Achieving Career Success, Australian Workplace Skills and Professional Business Communication; includes a three-month industry internship

Bachelor of Information Technology **2023 – 2025**
Federation University Australia, Berwick Campus
Key learning areas: Programming, Web Design, Mobile Development, Data Analytics, Cloud and Mobile Security, and IT Project Management

University Project

Reading Teacher's Vocabulary Visualiser (RTVV) – Capstone Project **2025**
Federation University Australia, Berwick Campus

Objective: The goal was to build an Android application that helps teachers, students and researchers analyse vocabulary in children's picture books. The app scans printed book pages, extracts the text and identifies sight words and unfamiliar vocabulary, so educators can judge the complexity of reading materials and support classroom learning and language research.

Tools: Flutter (Android SDK 34, Java 21), Google ML Kit text recognition (OCR), Jira (task management), GitHub (version control), Agile and Scrum methodologies.

Duties: This was a team project with five developers and two clients, and I was the Scrum Master. I coordinated team activities and sprints, managed Jira workflows to keep tasks on track, contributed to testing across each release, and met directly with the clients to gather feedback

and make sure the solution met real user needs. I also helped the team work through technical issues, such as SDK and dependency conflicts and performance lag in the Vocabulary Checker.

Outcome: We delivered the app over five iterative versions. The final release includes camera-based text scanning, a built-in Children's Picture Book sight word list with colour-coded highlighting, a Vocabulary Checker that flags unknown or rare words, and word frequency reports that can be saved or shared. The final version was released with no known bugs, and we handed over the final app (APK) and supporting documentation to our clients, who were happy with the result.

Result: Obtained Distinction for the capstone project units.

Employment History

Printing Company Team Member **Nov 2025 – Present**

Prima PMI, Noble Park, VIC

- Operating and supporting production equipment including the guillotine cutter, Infinitrim machine and case-in section, as part of a team producing an average of 3,000+ photobooks per day to meet vendor orders
- Identifying and reporting production issues to assist with continuous improvement
- Upholding quality control standards in a fast-paced production environment
- Maintaining strong attention to detail to ensure accurate, high-quality production output
- Following workplace procedures to support safety, efficiency and product quality
- Collaborating with team members to meet daily production requirements

Store Assistant Manager **May 2025 – Present**

Bostini Italian Restaurant, Cranbourne North, VIC

- Managing customer service operations in a busy hospitality environment serving an average of 100+ customers per day
- Supporting day-to-day store operations, including food preparation, barista coffee service and customer enquiries
- Maintaining high standards of food quality, hygiene, presentation and service
- Coordinating team members during busy service periods to improve workflow and customer satisfaction
- Resolving customer requests and issues professionally and in a timely manner
- Operating commercial equipment including Rational iCombi ovens, a blast chiller and coffee machines

Personal Attributes

- Leadership and communication skills, as demonstrated through acting as Scrum Master for a client-facing capstone project and coordinating a team to deliver an Android application
- Strong time management and organisational skills, developed through combining my final year of university study with work at Bostini Italian Restaurant
- Problem-solving and critical thinking skills, as demonstrated through resolving customer issues in a fast-paced hospitality environment and improving the RTVV application based on user testing
- Attention to detail and commitment to quality, demonstrated through maintaining quality control standards in a production role at Prima PMI
